

August 8, 2025

Good Afternoon,

Please see below for vendor questions received and answered (**in red**). These are also available on our website: <https://www.gmrc.ga.gov/rfp> Please also note that Appendix B has been updated to reflect that the City of Marietta would like to receive a quotation for 3" pixel resolution imagery.

Proposals are due August 22<sup>nd</sup> at 2:00 pm

1. Please confirm that the Final Data is to be delivered by September 30, 2026. Does this include the 30 to 60 days of potential edit calls and corrections? **Final data is to be delivered by September 30, 2026 unless weather conditions during flight window push out imagery/LiDAR capture OR there are participant delays in getting edit calls and corrections back to the vendor. In those cases, we will discuss with the chosen vendor reasonable expectations for delivery.**
2. Are iterative deliverables allowable (deliver specific Counties or Cities as they available for delivery)? **Yes**
3. Page 5 under Collection Area states that the Project Participants have submitted their AOI for use to calculate cost. Is there a link available that we can access to pull down the AOI via a shapefile or KMZ? Or can those files be made available by other means? **See below dropbox link**
4. For the Counties who are requesting 6" Imagery for the County and 3" for a City or Cities, would these be considered 2 separate datasets or are they requesting they be mosaiced together? **Both, 3" mosaic, 6" mosaic, and full county composite mosaic**
